What is "Value"?

Product Owner Value Game

Originally created by Dajo Breddels & Paul Kuijten

Overview & Objective

- Each group is one team
- You're competing against all the other teams in the room, and all the teams that have gone before you!
- You have five iterations, or 40 minutes, whichever comes first
- You have one objective:
 Earn as many Business Value Points as possible

How to Play

- Each Iteration, your team will start with 20 effort points
 - Think of this as your team's capacity
- Use the points to:
 - Refine a feature (costs 2 points)
 - Refine a story (costs ½ point)
 - Implement a story (cost shown in the circle)

FEATURE 5 Business Value Points 1500 Product Owner Value Game - @pauliu@en

Available Options:

- Refine a feature (costs 2 points)
 - X Refine a story (costs ½ point)
- X Implement a story (cost shown in the circle)

Iteration	Action	Points Spent	Points Remaining	Value Earned	Total Value
	Start of Iteration	0	20	0	0

Product Owner Value Game - @paukuijten						

Just to Clarify...

- You cannot build a Story that hasn't been refined
- You cannot refine a Story without it being tied to a refined Feature
- The order you refine Features & Stories is entirely up to you & your team
- All Stories related to a single Feature do not need to be built (but they can be – entirely up to your team)
 - We'll see what impact(s) there are to your results based on some of the decisions you make

Debrief

- What approach did you take in deciding what work to do first?
- How did the team come to agreement?

Debrief

- How does this match, or not match, your real work?
- What could you relate to?
- What's different?
- What assumption does this game have that, often, isn't true with the work items we're doing right now?

Debrief

- Is there anything specific you learnt?
- Is there anything you're going to take away from this game?

Jeff Kosciejew
